

Easter Newsletter Samples

Option 1

Holidays that have a central candy theme can make it difficult to find balance and safety if you or someone in your home is allergic. Changing the candy theme to crafting ideas or fun toys will help make Easter fun. Happy Easter!

Option 2

We are pleased to offer our patients allergy immunotherapy you can take anywhere you go. It's called sublingual immunotherapy — or allergy drops.

Like allergy shots, allergy drops treat the root cause of your allergies by helping you build tolerance to the substances that cause your allergic reactions. But with allergy drops, you simply place the antigens under your tongue in a liquid form three times per day, every day, at home or wherever you need to be. It's safe, effective, and easier than ever before for people of all ages. Best of all, the treatment is customized to your allergy test results to deliver just the right dose to be effective without increasing your risk of a reaction. Call <Provider name> at <Practice phone number> for your allergy evaluation today.
