

## **Mold Allergy Sublingual Immunotherapy Treatment Social Media Ideas**

### **Option 1**

Molds are found in a variety of places especially during wet, damp & humid conditions. Allergy drops are personalized to treat the root cause of your mold allergies and help you build tolerance and reduce allergic sensitivity. Contact us at <number> so you can help decrease your allergic reactions.

### **Option 2**

Molds are a type of fungus that are widespread in nature and recyclers of organic matter. Molds give off spores which become airborne and settle on organic matter and germinate in favorable conditions. These spores may cause allergic symptoms such as allergic rhinitis, hives, asthma, eczema, headache, chronic congestion, and fatigue. Learn how you can do more than just manage your symptoms by treating the cause of your allergies with personalized allergy drops.

### **Option 3**

If you find yourself sneezing or congested after working outside, you may be sensitive to mold. Allergy drops are a personalized immunotherapy that can help reduce or eliminate reactions to mold and other allergic sensitivities. Contact us to learn more about allergy drops and to see if you're a candidate for treatment.

### **Option 4**

Humid summer months provide the perfect conditions for mold growth indoors and outdoors. If you find yourself wheezing, congested, itchy, and/or fatigued, it may be a mold allergy. Custom sublingual immunotherapy (allergy drops under the tongue) may help you reduce and build tolerance to your mold allergies and other inhalant allergies. Call <Practice number> for your appointment today!

### **Option 5** [use with mold-allergy-tips.png]

Treatment for mold allergy starts by reducing mold exposure. Here are easy tips for combatting allergens, including mold allergy. Allergy drops can help decrease your allergic sensitivity and build tolerance over time to reduce or eliminate future reactions.

### **Option 6**

Heavy rainfall and flooding are perfect breeding grounds for mold. If you notice symptoms such as runny nose, hives, congestion, headaches, or fatigue, it may be a mold allergy. Custom allergy drops taken three times a day under the tongue can help you treat the cause of the allergy instead of just managing the symptoms! Call us today at <Practice Phone> for an appointment.
