

## **Spring Allergy Social Media Sample Language**

### **Option 1**

Spring often arrives with a runny nose, sneezing, and cough. Is it a cold or allergy? Colds will disappear while allergies linger. Call <phone number> for an allergy evaluation and treat your allergies with personalized sublingual immunotherapy drops.

### **Option 2**

There is no reason to suffer from allergies. Try sublingual immunotherapy drops, a safe and affordable allergy treatment that works at the cause of your allergies. Call <health care provider> today at <phone> for an allergy appointment.

### **Option 3**

Not sure if it is a cold or allergy? Consider speaking with <physician or health provider> and address the cause of your allergies with allergy drops. Call <phone> today for an appointment.

### **Option 4**

Enjoy spring allergy free! Take control of your allergies by treating the cause. Allergy sublingual drops offer great long-term solution to help the body learn to tolerate problem allergens.

### **Option 5**

Don't let spring allergies control your ability to enjoy the outdoors this year. Talk with your provider about whether personalized allergy drops might help you build tolerance so you can reduce your symptoms and better enjoy the outdoors. Contact us to find out if this may be a good choice for you.

### **Option 7**

Don't forget to change out your furnace filter to help improve your indoor allergen exposure.
